

ELITE
SERIES

Elite Series Self-Leveling Safety Stairs

G-RAFF Elite Series Self-Leveling Safety Stairs deliver enhanced rigidity and durable tread for safe access from a loading rack or dock to an elevated work surface.

The Elite Series also offers larger handrails, galvanized steel back box sections and back uprights on aluminum models.

Features

G-RAFF Elite Series Self-Leveling Safety Stairs have many unique features:

- Stronger engineered connection points
- Increased stability for attached fall protection enclosures
- Ideal access for isotainers
- Can be custom designed to meet various applications

Safety Enclosures

Various, custom designed safety enclosures are available for all G-RAFF Elite Series Self-Leveling Safety Stairs

Working Range

Greater than 15 degrees above or below working platform height

Materials of Construction

Rugged construction includes:

- Steel, aluminum, and fiberglass models available (or combination)
- Aluminum units have galvanized back box sections and back uprights
- Grip-strut walking surfaces
- Box channel side panels
- Oil-impregnated bronze flange bushings with individual treads

Mounting

Choose between:

- Slide-track mounting
- Pivot mounting
- Flush-mount brackets
