Spill Containment Pans

G-Raff Rail Car Spill Containment pans help keep rail cars and the environment clean by containing incidental spills that occur during rail car transfer operations.

Used individually or strung together, our spill containment pans are easily installed, and can be customized in length.

Features

G-Raff Spill Containment Pans have many unique features:

- Pans may be placed end-to-end for continuous coverage
- Can be customized in length
- Effective in both permanent and portable applications
- Usable in hot or cold climates
- Non-porous design
- Can be plumbed to a remote holding tank to provide for collection of large capacity spills
- Available with outrigger pans for spill containment on both sides of the track
- Meets and exceeds local, state, and federal regulations

Materials of Construction

- High strength, corrosion resistant fiberglass
- Painted Steel
- Galvanized Steel

Installation

A fast, clean installation includes:

- Limited site preparation
- No excavation
- No removal or modification to your current track required
- Ready for immediate use
- Can also be plumbed to a remote holding tank

Engineering

Our engineering team has over 150 years of experience collectively and utilizes state-of-the-art CAD software.
